Cal OES INLAND REGION

Stanislaus River Erosion Incident, San Joaquin County

On 12/13/19 at 1503 hours, the California State Warning Center was notified by the Department of Water Resources Flood Operations Center (FOC) of significant erosion occurring on a bank on the Stanislaus River.

- No flooding is occurring and there is no emergency at this time.
- The site is on the right bank of the Stanislaus River at approximately Levee Mile 2.4.
- RD Engineers believe the damage was caused by a falling tree. The tree caused the water to swirl causing the erosion. They are concerned about other trees falling into the river and causing more issues.
- The Stanislaus River level has dropped since water release from Goodwin Dam were reduced on 12/12/19:
 - Water level decreased over the weekend, and the erosion has significantly slowed.
 - The lower water level has exposed most of the damage.
- Per Cal OES GIS:
 - Potential population impact if flooding were to occur:
 - Households: 130 (Per Reclamation District (RD) only 40-50 homes)
 - Population: 380 (Per RD only 200 people)
- On 12/16/19, the County met with DWR Engineers, Division of Engineering, Flood Operation Center and RD at the site to discuss scope of work and a repair plan.
- On 12/17/19 at 0700 hours, a Contractor began work on the erosion site. This included equipment delivery and preparing the site for rock placement, which will begin on 12/18/19.
- Repairs are estimated to be completed 12/23/19.

Activations

- Flood Operations Center (FOC) is activated during the week.
 - Operational Period: 0800 hours to 1700 hours, Duty Officer after hours and this weekend.

Proclamations

- On 12/12/19, Reclamation District 2064 proclaimed an emergency and submitted the Resolution to San Joaquin County OES on Friday 12/13/19.
- The San Joaquin County Director of Emergency Services will proclaim a local emergency in support of RD 2064.
 - On 12/17/19, San Joaquin County ratified its proclamation.

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Hazardous weather outlook for Northwest California.
 - Scattered snow showers above 2,500 feet Wednesday morning may produce an inch or two of snow.

SOUTHERN CALIFORNIA

- Sustained east to southeast winds 20 to 30 mph, with gusts local near 55 mph for portions of the South end of the San Joaquin Valley and adjacent mountains including Grapevine, Frazier Park and Tehachapi until approximately 2300 hours tonight.
 - Highways affected include, but are not limited to I-5, Hwy. 178, and Hwy. 58 through Tehachapi Pass.
- Areas of north to northeast winds 20 to 30 mph with gusts up to 45 mph will continue to diminish tonight for portions of Ventura and Los Angeles County Mountains, including the Santa Monica Range until approximately 0300 hours Wednesday.
 - Roadways affected include: Hwy. 33 in Ventura County Mountains, I-5 and Hwy. 14 in Los Angeles County Mountains; and across the Santa Monica Mountains, Kanan, Malibu Canyon, Topanga, and Decker Canyon Roads
- Areas of northeast winds 15 to 25 mph with gusts 35 to 40 mph will continue to diminish tonight. The strongest winds will occur across the eastern portions of Ventura County and Santa Clarita Valleys until approximately 0300 hours Wednesday.
 - Highways 5, 14, 23, 101 and 118 will be affected by the gusty winds.
- Areas of north to northeast winds 15 to 25 mph with gusts to 35 mph will continue to diminish tonight. The strongest winds will occur across mainly west and northern portions of the San Fernando Valley until 0300 hours Wednesday.
 - Highways 101 and 118 as well as Interstates 5, 210, and 405, will be affected by the gusty winds.
- East winds 20 to 30 mph with gusts to 60 mph for portions of the San Bernardino County Mountains, Riverside County Mountains, Santa Ana Mountains and Foothills, San Diego County Mountains, and San Geronimo Pass Near Banning until approximately 2200 hours this evening.
 - Winds will be strongest near mountain ridge tops and along the coastal slopes of the mountains.
 - Peak gusts from earlier today include 91 mph at Hellhole Canyon in San Diego County and Freemont Canyon in the Santa Ana Mountains.
- There is a chance of light rain across Santa Barbara and San Luis Obispo Counties late tonight and Wednesday. Otherwise, the region will be dry through Saturday.

WEATHER KEY POINTS

12/17/19 - 12/23/19

Tuesday

- Periods of gusty winds will continue across Southern Region. Localized downed trees and power outages possible along with minor travel impacts
- Light to moderate rain will reach the coast today, mainly in Coastal Region, but no significant impacts are expected

Wednesday

- Lower elevation rain and snow over the mountains in the Inland Region with minor travel impacts

Thursday-Friday

- Dry conditions across much of the state except for the northern coastal areas with no significant impacts

Saturday-Monday

- Rain and mountain snow returns to much of the state with the potential for minor travel impacts. Locally heavy rain is possible but exact locations uncertain at this time.
